Why crawl...when you can run? If you're still relying on a slow dial-up connection that ties up your phone line, you're waiting around when you could be getting things done. HughesNet® is available where you live right now—even if you live in an area where cable Internet and DSL don't reach. America's #1 choice for satellite Internet is a super-fast, always-on Internet connection. Enjoy the Internet the way it was meant to be!

### HughesNet is:

- **Fast**—Downloads files in minutes, not hours
- **Always-on**—Makes dialing in and logging on a thing of the past
- **Trusted**—From the leader in satellite Internet

1. When you connect to the Internet using HughesNet, the upload and download speeds you experience will vary based on a variety of factors including the configuration of your computer; the number of concurrent users; network or Internet congestion; the speed of the Web sites you are accessing; and other factors. Stated speeds and uninterrupted use of service are not guaranteed. During peak hours, actual upload and download speeds will likely be lower than speeds indicated.

2. Based on an analysis of customer usage data, Hughes has established a download allowance for each of the HughesNet service plans that is well above the typical usage rates. Subscribers who exceed that threshold will experience reduced download speeds for approximately 24 hours. During this recovery period, the HughesNet service may still be used, but speeds will be slower.

3. Express Repair - Basic includes 2nd business day contact, 8 a.m.–5 p.m. Eastern Time, Monday through Friday. \$29.95 per onsite repair incident in addition to monthly fee.

4. The Power 200 service plan is only available through the new HughesNet satellite. Approximately 1% will not be able to receive the Power 200 plan as a result of trees or other obstacles that block the signal from the satellite to the home.
